COMPANY OVERVIEW

YasYum Ltd is a Nigerian technology and infrastructure solutions company providing integrated digital, ICT, electronic security and renewable energy solutions to government institutions, businesses and organizations.

Our capabilities combine software engineering, digital solutions, ICT infrastructure, CCTV surveillance, electronic security, solar power systems, networking and technical maintenance to help organizations improve security, operational efficiency, connectivity and energy reliability.

YasYum Ltd provides solutions designed around the specific operational and technical requirements of each client. Our project approach covers needs assessment, site survey, technical planning, solution design, supply, installation, configuration, integration, testing, commissioning, training and ongoing maintenance.

Our multidisciplinary capability allows us to combine physical infrastructure with digital technology. This enables us to develop and deploy solutions such as solar-powered CCTV surveillance systems, networked security infrastructure, digital workflow platforms, data dashboards, facility monitoring systems and integrated ICT infrastructure.

YasYum
LTD

RC 7908363

ABOUT US

The company is supported by technical personnel with extensive practical experience across CCTV, solar energy, software development, data systems, networking and ICT solutions.
YasYum Ltd is committed to delivering practical, reliable and scalable solutions supported by proper documentation, technical support and responsive after-sales service.
We serve clients across the Federal Government, FCT Government, state institutions, private organizations and other corporate and institutional clients.

OUR VISION

To become a trusted Nigerian provider of integrated technology, security, ICT infrastructure and renewable energy solutions for public and private sector organizations.

OUR MISSION

To design, deploy and maintain practical technology and infrastructure solutions that improve security, connectivity, energy reliability and operational efficiency.

YasYum LTD

RC 7908363

OUR CORE VALUES

INTEGRITY

We conduct our business with honesty, transparency and respect for our clients and partners.

PROFESSIONALISM

We approach every project with proper planning, technical discipline and attention to detail.

RELIABILITY

We provide dependable solutions designed for practical use and long-term operation.

INNOVATION

We apply appropriate technology to solve real operational problems.

ACCOUNTABILITY

We take responsibility for the quality, documentation and support associated with our projects.

YasYum LTD

OUR CORE SERVICES

DIGITAL & SOFTWARE SOLUTIONS

YasYum Ltd provides custom software and digital solutions for organizations seeking to improve their operations and service delivery.

Our capabilities include:

- Custom web application development
- Government and institutional websites
- Digital workflow systems
- Document management systems
- Citizen-facing digital platforms
- Business dashboards
- Data analytics and reporting
- Artificial Intelligence and Machine Learning solutions
- Database systems
- REST API development and integration
- Business process automation
- Digital transformation solutions
- Cloud-based applications
- System maintenance and technical support

YasYum LTD

RC 7908363

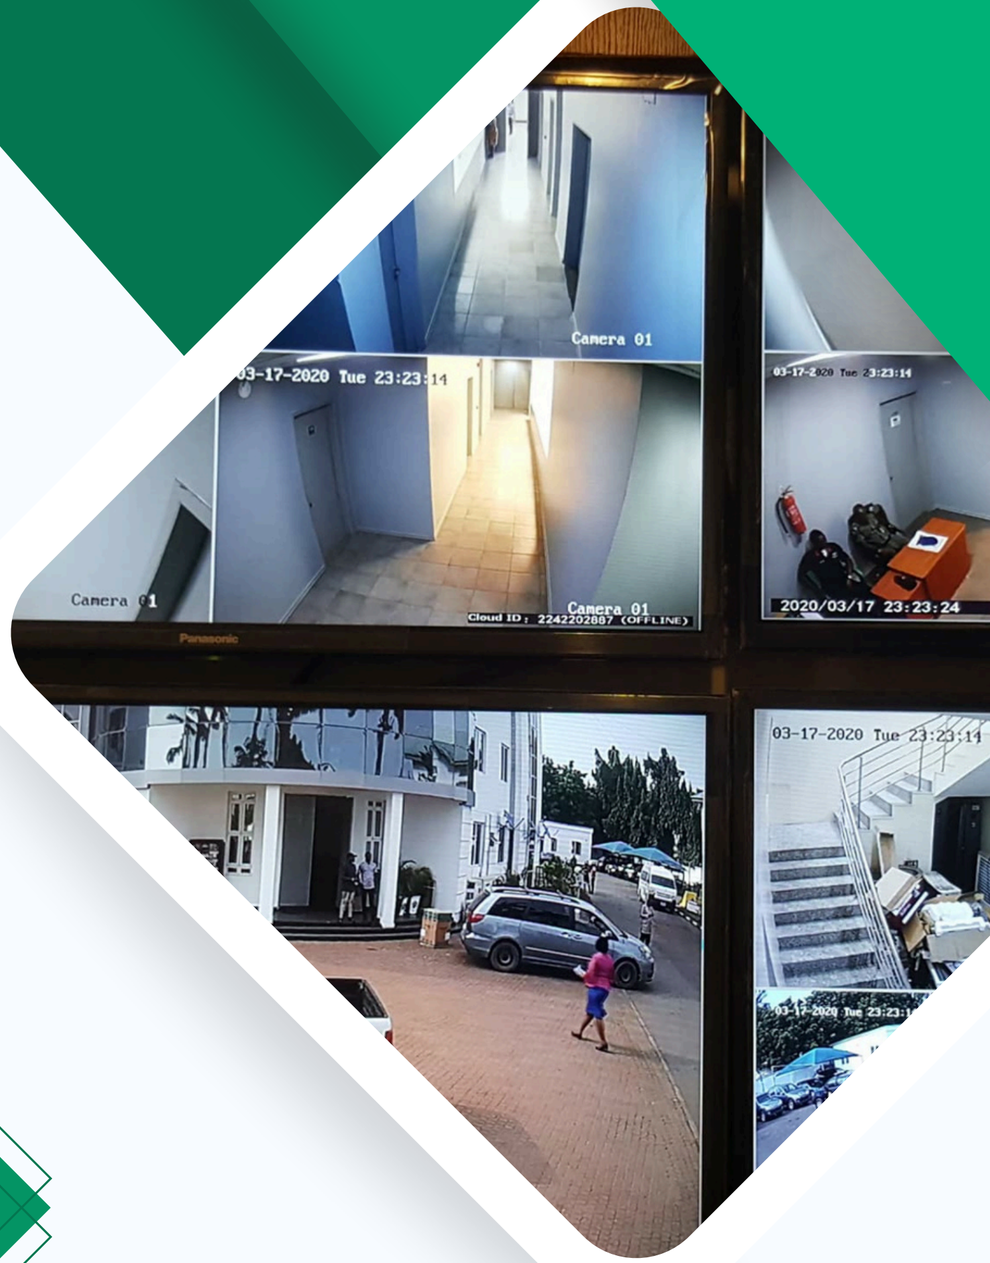
CCTV & ELECTRONIC SECURITY

Our security solutions are designed to help organizations monitor facilities, protect assets and improve situational awareness.

Services include:

- IP CCTV installation
- DVR/NVR systems
- CCTV system upgrades
- CCTV maintenance
- Camera replacement and expansion
- Networked CCTV systems
- PoE infrastructure
- Remote CCTV monitoring
- Access control systems
- Biometric systems
- Visitor management systems
- Security system troubleshooting
- Surveillance system maintenance

Our technical leadership has over 15 years of experience in CCTV and electronic security, with experience covering projects undertaken for government institutions, including projects in Imo, Abia and Kwara States.



YasYum
LTD

RC 7908363

SOLAR & RENEWABLE ENERGY SOLUTIONS

YasYum Ltd provides solar and backup power solutions designed to improve energy availability and reduce dependence on conventional power sources.

Our services include:

- Solar PV systems
- Hybrid solar systems
- Inverter systems
- Battery energy storage
- Solar backup power
- Solar-powered CCTV systems
- Solar lighting solutions
- Solar system installation
- System upgrades
- Preventive maintenance
- Fault diagnosis and technical support

Our technical team and project partners bring over 12 years of practical experience in solar energy systems and installations.

YasYum LTD

RC 7908363

ICT INFRASTRUCTURE & NETWORKING

We provide ICT infrastructure solutions for offices, institutions and government facilities.

Our services include:

- LAN and WAN installation
- Structured network cabling
- Network rack installation
- Switch installation and configuration
- Router configuration
- Wi-Fi infrastructure
- Network troubleshooting
- CCTV networking
- Internet infrastructure
- Server and IT infrastructure support
- ICT equipment installation
- Network maintenance and support

YasYum LTD

RC 7908363

TECHNICAL MAINTENANCE & SUPPORT

YasYum Ltd provides ongoing technical support and maintenance for deployed technology and infrastructure.

Maintenance services include:

- CCTV preventive maintenance
- CCTV fault diagnosis and repair
- Solar system maintenance
- Network maintenance
- ICT equipment support
- Software maintenance
- System inspection
- Preventive maintenance programmes
- Emergency technical support
- Equipment replacement and upgrades

Our objective is not only to install systems but to help clients keep them operational throughout their service life.

YasYum LTD

RC 7908363

CONFERENCE, LANGUAGE & EVENT TECHNOLOGY SERVICES

YasYum Ltd provides language and technical support services for international conferences, summits, seminars, workshops, diplomatic engagements, corporate meetings and other multilingual events.

Our Services Include

- Simultaneous language interpretation
- Consecutive interpretation
- Conference and summit interpretation
- Multilingual event support
- Document and presentation translation
- Remote and hybrid interpretation support
- Interpretation equipment coordination
- Interpreter booths, headsets and related equipment
- Conference audio and communication support
- Technical support for interpretation systems

International Conferences & Summits

We can support organizers of international conferences, government programmes, diplomatic engagements, business summits, workshops, seminars and institutional events where participants require multilingual communication.

YasYum LTD

INTEGRATED SOLUTIONS

One of YasYum Ltd's strengths is the ability to combine different technologies into a single operational solution.

SOLAR-POWERED CCTV SURVEILLANCE

A complete security solution combining:

- CCTV cameras
- Solar panels
- Battery storage
- Inverters/controllers
- Network infrastructure
- Recording equipment
- Remote monitoring

This is particularly useful for locations where reliable grid electricity or conventional infrastructure is unavailable.

YasYum
LTD

RC 7908363

SMART FACILITY SECURITY SOLUTION

An integrated facility solution combining:

- CCTV surveillance
- Access control
- Biometric systems
- Network infrastructure
- Solar backup
- Central monitoring
- Digital reporting

DIGITAL GOVERNMENT WORKFLOW SOLUTION

A software-based solution combining:

- Digital document management
- Workflow and approvals
- Notifications
- User management
- Reporting dashboards
- Data storage
- Audit trails

YasYum LTD

RC 7908363

ICT INFRASTRUCTURE UPGRADE

A complete infrastructure deployment covering:

- Structured cabling
- Network racks
- Switches
- Routers
- Wi-Fi
- CCTV networking
- Server infrastructure
- Configuration and testing

INTEGRATED FACILITY MAINTENANCE

A coordinated maintenance programme covering:

- CCTV
- Solar systems
- Network infrastructure
- ICT equipment
- Software systems
- Preventive inspections
- Technical support

DIGITAL & SOFTWARE PROJECT EXPERIENCE

YasYum's software and digital technology capability includes experience in developing data-driven applications and business platforms.

SALES FORECASTING DASHBOARD

A data analytics solution designed to provide sales insights, forecasting and visual reporting to support business decision-making.

CUSTOMER CHURN PREDICTION

A machine-learning solution designed to analyze customer behaviour and identify patterns associated with customer churn.

CONSTITUENCY CONNECT

A digital platform designed to improve communication between elected representatives and citizens while providing access to constituency information, projects, notices, events and community engagement features.

SMARTWRITE

A digital writing and productivity platform concept designed to assist users with document creation, proposals, letters, CVs and other forms of written content.

These projects demonstrate YasYum's capability in software engineering, data analytics, dashboards, web applications, automation and digital platforms.

YasYum LTD

SELECTED EXPERIENCE

YasYum Ltd's technical team has experience associated with projects involving CCTV and electronic security, including work undertaken for government institutions in:

- Imo State
- Gebeya
- Kreative Waves
- Abia State
- Kwara State
- CS-SUNN
- Ebonyi State
- Other institutional and private-sector environments

The company also has experience in solar system deployment and maintenance.

Detailed project references, photographs, completion documentation and client references will be provided where available and appropriate.

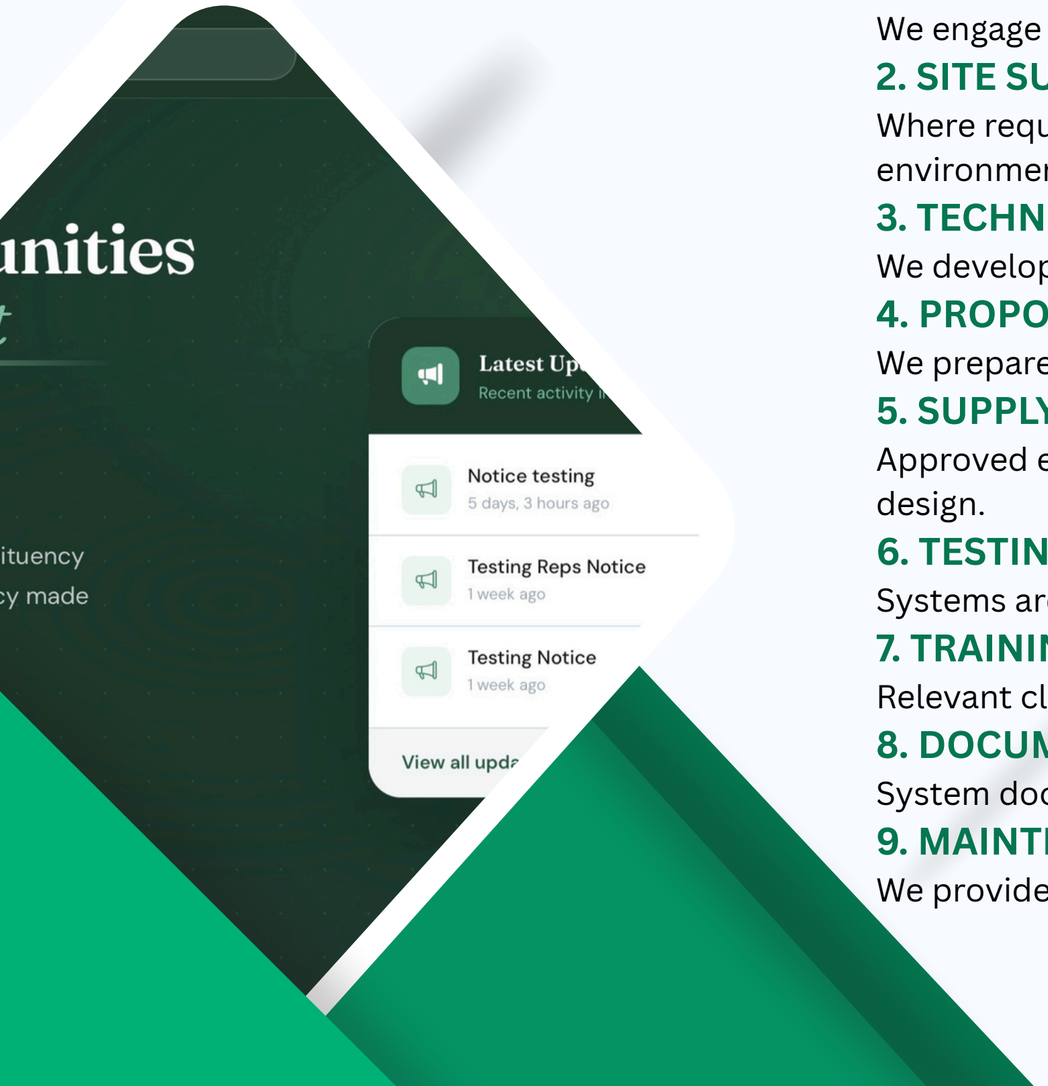
YasYum LTD



PROJECT DELIVERY APPROACH

YasYum Ltd follows a structured approach to project delivery.

1. NEEDS ASSESSMENT

We engage with the client to understand the operational challenge and desired outcome.

2. SITE SURVEY

Where required, our technical team conducts a physical assessment of the proposed installation environment.

3. TECHNICAL DESIGN

We develop the appropriate technical architecture, equipment requirements and implementation plan.

4. PROPOSAL & COSTING

We prepare a detailed technical and financial proposal based on the identified requirements.

5. SUPPLY & INSTALLATION

Approved equipment and systems are supplied, installed and configured according to the approved design.

6. TESTING & COMMISSIONING

Systems are tested to confirm functionality, reliability and compliance with agreed requirements.

7. TRAINING

Relevant client personnel receive operational training where applicable.

8. DOCUMENTATION

System documentation, user information and relevant technical records are provided.

9. MAINTENANCE & SUPPORT

We provide ongoing technical support, preventive maintenance and system upgrades where required.

YasYum
LTD

RC 7908363

WHY YASYUM LTD

INTEGRATED CAPABILITY

We combine software, ICT infrastructure, CCTV, security and renewable energy capabilities.

END-TO-END DELIVERY

Our approach covers assessment, design, installation, integration, testing, training and maintenance.

EXPERIENCED TECHNICAL LEADERSHIP

Our technical leadership brings extensive experience in CCTV, solar energy, software and digital technology.

LOCAL TECHNICAL SUPPORT

We provide locally accessible technical support for deployed systems.
Scalable Solutions
Our solutions can be designed for small facilities or expanded to larger institutional deployments.

LONG-TERM SUPPORT

We focus on maintaining systems after deployment through preventive maintenance and technical support.

PRACTICAL TECHNOLOGY

We focus on solutions that address real operational problems rather than technology for its own sake.
